With a background in the textile industry as a pattern maker and product developer of apparel, I decided to **change careers**. I became a **front end developer** and have been coding since November 2022.

I am a **result driven, curios and knowledge seeking** person. I am combining the best of two worlds **creation, and attention to detail** in apparel product development, and **continuously learning and seeking solutions** in coding. I am eager to start this journey, looking forward to meeting your team!

Education

SheCodes.io — Front end — Bootcamp — 2023 — (8m)
- Learning coding fundamentals in HTML, CSS and JavaScript
- Creating **responsive** design application
- Deployment and hosting on **Github** and **Netlify**
- Integrating **API** in my projects
- Building projects following **React** and **Bootstrap** frameworks

Borås Swedish School of textiles — Bachelor — 2014-2019
- **Product development** for the apparel industry
- Creating manufacturing instruction and cost calculations

Work experience

Garment technician — Villeralla — 2022 — (3m)
- Convert **design into production** instructions
- **Manage deadlines**, cost and quality with producers

Product coordinator — Lundhags — 2022 — (6m)
- Working with specialised **3D software** for garments and rendering
- Facilitating sales, design and production meetings

Product developer — Alligo — 2021 — (6m)
- Control allocations of resources to deliver projects
- Perform **quality controls** and product evaluations

Patternmaker — Dr Denim — 2019-2021 — (2y)
- Working in **product team** with designers and developers
- Creative **problem solving** to maintain quality and deadlines
